International Day of Disable people.

3-12-17

Each day we discover that disabilities are more common to all humans in the society and coexistence we have built. to remain in the physical disability, is to lie to ourselves.

The hunger, not to experience the same health for everyone, wars, urgent migrations, the business with arms, and wars, the capitalism, what are expressed in leisure, fun, fashion... lack of ethics and moral expressed in corruption so common. female discrimination, sexual orientation, for your religious, political economic, believes, place where you were born, color of your skin the lack of recognition of our equal recognition for every human being, the wealth rejection or our differences, not to accept our own limitation... all of this is an expression, a photograph, still small, of our reality.

It is not pessimistic, to discover and say that all of this exists, and, that in some way, we all have some responsibility.

It is also fair to say, that our capability to humanize life, the economy, politics, and our coexistence, and our care for the land so it is viable, and inhabitable, a fraternal place, are bigger than those to harm ourselves.

That life, lived in a human way, as simple as that, is only, not only to be mine-our cause, that should never stop to be, and that will also become a common cause, a share duty and responsibility, in liberty.

Women and men, do it this way, they have done it: Mandela, Luther King, Gandhi, François, Mujica, Jesus, Romero, and many more. Opening our eyes to life we can discover them, we should start the task to learn how to look, as the "little prince" would say: you can only see everything with your heart. The essential is invisible to the human eyes. Therefore, is so important to see with your heart.

The 3rd of December is a touch to the heart of every human being, so every day of the year we take a proper look... so your systole and diastole rhythm will be of human-dignity and love and justice

We are responsible of the rose- of my resemble. Let's look after the rose- our resemble, is unique- every human being.
